About this release

NetVault Bare Metal Recovery Plug-in Server 11.0 is a minor release, with enhanced features and functionality. For complete product documentation, visit <http://software.dell.com/support/>.

- ① **IMPORTANT:** Starting with 10.0, NetVault Backup provides a web-based user interface (WebUI) to configure, manage, and monitor your NetVault Backup system. The procedures described in the user's guide for this version of the product are intended for the new WebUI. For procedures based on the NetVault Backup Console (user interface available with NetVault Backup 9.x), see the documentation for an earlier version of the product.

Resolved issues

The following is a list of issues addressed in this release.

Table 1. General resolved issues

Resolved issue	Issue ID
Added support for Universal Serial Bus (USB) devices that use the 3.0 protocol.	26384, 26980
Corrected an issue that prevented backups from completing when Disk Raw Mode was selected but Compression was not.	27831

Table 1. General resolved issues

Resolved issue	Issue ID
Corrected an issue that caused the size of a restore to differ from the size of the corresponding backup.	28244
Corrected an issue that prevented a Windows Server 2012 R2 GUID Partition Table (GPT) from starting during recovery.	30493
Corrected an issue that prevented NetVault Bare Metal Recovery Plug-in Server support on Dell Precision Tower 5810.	30510

Known issues

The following is a list of issues, including issues attributed to third-party products, known to exist at the time of release.

Table 2. General known issues

Known issue	Issue ID
NetVault Backup Server only backs up the selected partitions when the Disk Raw Mode option is enabled. If only a few partitions are selected with the Disk Raw Mode option enabled, only the selected partitions are backed up. Workaround: Select the entire disk for backup before selecting Disk Raw Mode . NOTE: If the entire disk is selected but some of the partitions are crossed out and the Disk Raw Mode option is enabled, the entire disk is backed up. You cannot exclude partitions when the Disk Raw Mode option is enabled.	17712 (VOG-173)
Cannot restore VMDK Images concurrently.	17801 (VOG-95)
Cannot restore a VMDK Image to a shared network drive.	17802 (VOG-96)

System requirements

Before installing NetVault Bare Metal Recovery Plug-in Server 11.0, ensure that your system meets the requirements outlined in the *Dell NetVault Backup Compatibility Guide* available at <https://support.software.dell.com>.

Upgrade and compatibility

For complete supported-platform information, see the *Dell NetVault Backup Compatibility Guide*.

Product licensing

To obtain the license key for your NetVault Backup Server environment, determine the NetVault Machine ID of your main NetVault Backup Server. Also identify the machine IDs of any clients running application plug-ins, such as Oracle[®], MySQL, PostgreSQL, SQL Server[®], and Exchange.

You can use the NetVault Configuration Wizard to install the product license keys. Alternatively, you can install the license keys from the Manage Clients page.

Obtaining a machine ID

- 1 Start the NetVault Backup WebUI.
- 2 In the Navigation pane, click **Manage Clients**.
- 3 In the **NetVault Backup Clients** list, select the applicable machine, and click **Manage**.
- 4 On the **View Client** page, note the machine ID exactly as it appears in the **Client Summary** table.

Installing a license key using the configuration wizard

- 1 In the **Navigation** pane, click **Guided Configuration**.
- 2 On the **NetVault Configuration Wizard** page, click **Install Licenses**.
- 3 In the **NetVault Backup Clients** list, select the applicable machine, and click **Next**.
- 4 In the **Enter the license key string** box, type or copy and paste the license key, and click **Apply**.
After the key is applied successfully, a message is displayed.

Installing a license key from the Manage Clients page

- 1 In the **Navigation** pane, click **Manage Clients**.
- 2 In the **NetVault Backup Clients** list, select the applicable machine, and click **Manage**.
- 3 On the **View Client** page, click **Install License**.
- 4 In the **Install License** dialog box, type or copy and paste the license key, and click **Apply**.
After the key is applied successfully, a message is displayed.
- 5 To dismiss the dialog box, click **Close**.

Upgrade and installation instructions

- Upgrading to NetVault Bare Metal Recovery Plug-in Server v4.0 or later requires that you upgrade NetVault Bare Metal Recovery Plug-in Offline Client to v6.0 or later to perform backups and restores. You must also re-create all backup and restore jobs. (18049)
- For upgrade and installation instructions, see the *Dell NetVault Bare Metal Recovery User's Guide*.
